E per individuare documenti o directory esposti sui siti useremo combinazioni di GOOGLE DORKING

Utilizzo del programma MALTEGO:

CONCLUSIONE

Dopo aver utilizzato i vari metodi di OSINT, possiamo verificare tutti i materiali che abbiamo reperito come informazioni utili per impostare una difesa o un attacco verso l'azienda analizzata.

Mia preferenza personale dove ho trovato più informazioni utili e con tempistiche più rapide sono i 3 metodi: DNS, WHOIS, MALTEGO.

Invece GOOGLE DORKING e un metodo molto lungo dove non si mette in dubbio la possibilità di trovare varie informazioni e documenti, ma sono tante informazioni da analizzare, eco perché e consigliabile affiancarlo con AI, per velocizzare tutto il processo.
